

DRINKING WATER PROBLEM CORRECTED

Town of Chatham

Customers of the Town of Chatham within the corporate limits and service areas north along Rt. 29 were notified on Friday, July 7, 2017 of a problem with our drinking water, and were advised to boil all drinking/cooking water until further notice.

A water line break occurred at the waterworks and the break was corrected on Saturday, July 8, 2017. The Boil Water Notice was issued as a safety precaution while the bacteriological quality of the water distributed in the water system was checked after the repaired line was returned to service..

Additional sampling performed on July 8 and July 9, 2017 resulted in all distribution samples testing negative for detection of bacteria in the water. Therefore, we are pleased to report that the problem has been corrected and that it is no longer necessary to boil all drinking/cooking water. We apologize for any inconvenience and thank you for your patience.

As always, you may contact Rodney Bryant, Director of Public Utilities at the Town of Chatham Town Office at (434) 423 – 9515 or at 16 Court Place, Chatham Virginia with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
